

NEXT MEETING

JUNE 15th 6:00 PM**1484 MASSARO BLVD. TAMPA, FL 33619****R.S.V.P. BY JUNE 12th** webmaster.region12@gmail.com or 941-400-3476

OUR HOST & SPONSOR!

Odysey Manufacturing began operations at its "state of the art" bleach manufacturing facility in Tampa, Florida in March of 2000. The manufacturing facility utilizes chlor-alkali technology for the production of bulk sodium hypochlorite. Odyssey's Ultra-Chlor sodium hypochlorite is engineered to be a superior quality product and is manufactured at a concentration of 12.5 Trade Percent Available Chlorine. Its new fleet of tractors and tanker trailers provide bulk truckload delivery to its customers. Odyssey also sells on-site generation equipment for those of its customers that elect to go with this option. Odyssey is uniquely positioned to service this equipment, provide backup sodium hypochlorite during maintenance periods and even to provide the salt out of its large indoor warehouse in Tampa which stores over 50 tons of salt. Recently, Odyssey began selling a Ground Storage Tank mixing system for its customers.

The exceptional quality of **ULTRA CHLOR** sodium hypochlorite is unmatched in the industry.

ULTRA CHLOR is produced from the purest ingredients and has virtually no metal contaminant's or suspended solids. In most cases, Iron, nickel, copper, and other heavy metal ions that catalyze bleach decomposition are below detectable levels. The continuous process equipment provides low manufacturing temperature without localized overheating. Continuous process sodium hypochlorite also has quality in terms of concentration, ratio, ph, and excess alkalinity.

What The Heck is That?????

Take a look at this picture. Have you ever seen one of these? Do you have a guess? Bring your answer to the **NEXT MEETING** and you could win **BAM!** That's **Bumming Around Money!** All correct guesses are put in a hat, and the winner drawn at random will win **\$25 U.S.**

GENERAL MEMBERSHIP MEETING
